

boost::statechart::
event< EvWaypoint233
< TSource, TOrthogonal > >

```
classDiagram
    class Base["boost::statechart::event< EvWaypoint233< TSource, TOrthogonal > >"]
    class Derived["cl_move_base_z::EvWaypoint233< TSource, TOrthogonal >"]
    Derived --|> Base
```

The diagram illustrates an inheritance relationship. A base class box at the top contains the text 'boost::statechart::event< EvWaypoint233< TSource, TOrthogonal > >'. It is divided into three horizontal sections, with the text in the top section and the bottom two sections being empty. A derived class box at the bottom, shaded gray, contains the text 'cl_move_base_z::EvWaypoint233< TSource, TOrthogonal >' in its top section, '+ waypointIndex' in its middle section, and is also divided into three horizontal sections. A blue arrow with a hollow triangular head points from the top of the derived class box to the bottom of the base class box.

cl_move_base_z::EvWaypoint233
< TSource, TOrthogonal >

+ waypointIndex
