::updateRecordPath

```
graph LR; A["cl_move_base_z::odom_tracker::OdomTracker::updateRecordPath"] --> B["cl_move_base_z::odom_tracker::p2pDistance"]
```

A diagram showing a call to the `updateRecordPath` method of the `OdomTracker` class. The call is represented by a grey box on the left, and a blue arrow points from it to a white box on the right, which represents the variable `p2pDistance` that is being updated.
