The diagram illustrates an inheritance relationship. A light gray box at the top represents the base class `boost::statechart::event< EvWaypoint243 < TSource, TOrthogonal > >`. It has three horizontal compartments, with the first containing the class name. A blue arrow with an open triangular head points from the bottom of a darker gray box to the bottom of the light gray box. The darker gray box represents the derived class `cl_move_base_z::EvWaypoint243 < TSource, TOrthogonal >`. It has three horizontal compartments: the first contains the class name, the second contains the public attribute `+ waypointIndex`, and the third is empty.
