The diagram illustrates an inheritance relationship. A base class, `boost::statechart::event< EvWaypoint190 < TSource, TObjectTag > >`, is shown in a white box with a thin grey border. It has two empty rectangular compartments below its name. A derived class, `cl_move_base_z::EvWaypoint190 < TSource, TObjectTag >`, is shown in a grey box with a thick black border. It contains the attribute `+ waypointIndex` in its second compartment. A blue arrow with a hollow triangular head points from the top of the derived class box to the bottom of the base class box, indicating that the derived class inherits from the base class.

```
cl_move_base_z::EvWaypoint190  
  < TSource, TObjectTag >
```

```
