

```
sm_fetch_screw_loop  
_1::cl_move_group_interface  
::CpConstraintVirtualSideWall  
::createVirtualCollisionWalls
```

A diagram showing a transformation between two states. On the left, a grey rectangular box contains the text 'sm\_fetch\_screw\_loop', '\_1::cl\_move\_group\_interface', '::CpConstraintVirtualSideWall', and '::createVirtualCollisionWalls'. A blue arrow points from this box to a white rectangular box on the right. The white box contains the text 'sm\_fetch\_screw\_loop', '\_1::cl\_move\_group\_interface', '::CpConstraintVirtualSideWall', and '::createCollisionBox'. The arrow indicates a change from 'createVirtualCollisionWalls' to 'createCollisionBox'.

```
sm_fetch_screw_loop  
_1::cl_move_group_interface  
::CpConstraintVirtualSideWall  
::createCollisionBox
```
