```
graph BT; A["smacc_sm_reference_library/sm_respira_1/src/sm_respira_1_node.cpp"] --> B["smacc_sm_reference_library/sm_respira_1/sm_respira_1.h"]; B --> C["smacc_sm_reference_library/sm_respira_1/include/sm_respira_1/mode_states/ms_calibration.h"];
```

The diagram illustrates a dependency chain in a C++ project. It consists of three rectangular boxes arranged vertically, connected by blue arrows pointing upwards. The bottom box contains the source file path. The middle box contains the header file path. The top box contains the header file path, which is highlighted with a gray background. The arrows indicate that the source file depends on the header file in the middle box, which in turn depends on the header file in the top box.
