The diagram shows a base class box at the top with a light gray background and a derived class box at the bottom with a darker gray background. A blue arrow with an open triangular head points from the derived class to the base class, indicating inheritance. The base class box is divided into three horizontal sections; the top section contains the class name, while the middle and bottom sections are empty. The derived class box is also divided into three horizontal sections. The top section contains the class name, the middle section contains a public attribute '+ waypointIndex', and the bottom section is empty.
