The diagram illustrates an inheritance relationship. At the top is a base class box for `boost::statechart::event< EvWaypoint206 < TSource, TOrthogonal > >`. Below it is a derived class box for `cl_move_base_z::EvWaypoint206 < TSource, TOrthogonal >`. A blue arrow with an open triangular head points from the derived class to the base class. The derived class box has a light gray background and contains a public attribute `+ waypointIndex` in its second compartment.
