

```
boost::statechart::  
event< EvWaypoint131  
< TSource, TObjectTag > >
```

A UML class diagram showing inheritance. A blue arrow with an open triangular head points from the class `cl_move_base_z::EvWaypoint131` to the class `boost::statechart::event< EvWaypoint131 < TSource, TObjectTag > >`. The target class is white with a light gray border and is divided into three horizontal sections. The source class is gray with a black border and is divided into three horizontal sections. The first section of the source class contains the class name and template parameters. The second section contains a public attribute `+ waypointIndex`. The third section is empty.

```
cl_move_base_z::EvWaypoint131  
  < TSource, TObjectTag >
```

```
+ waypointIndex
```
