

```
boost::statechart::  
event< EvWaypoint235  
< TSource, TObjectTag > >
```

A UML class diagram showing inheritance. A blue arrow with an open triangular head points from the class `cl_move_base_z::EvWaypoint235` to the class `boost::statechart::event< EvWaypoint235 < TSource, TObjectTag > >`. The target class is a base class with an empty body, while the derived class has a public attribute `waypointIndex`.

```
cl_move_base_z::EvWaypoint235  
  < TSource, TObjectTag >
```

```
+ waypointIndex
```
