The diagram shows a class hierarchy. The base class is `boost::statechart::event< EvWaypoint109 < TSource, TOrthogonal > >`. The derived class is `cl_move_base_z::EvWaypoint109 < TSource, TOrthogonal >`. The derived class has a public attribute `+ waypointIndex`. The inheritance is indicated by a solid blue arrow with an open triangular head pointing from the derived class to the base class.
