

```
boost::statechart::  
event< Evsr_conditionalTrue  
    < TSource, TObjectTag > >
```

The diagram shows two class boxes. The top box is white and contains the text 'boost::statechart::event< Evsr\_conditionalTrue < TSource, TObjectTag > >'. The bottom box is gray and contains the text 'smacc::state\_reactors::Evsr\_conditionalTrue < TSource, TObjectTag >'. A blue arrow with an open triangular head points from the bottom box to the top box, indicating that the bottom class inherits from the top class.

```
smacc::state_reactors  
::Evsr_conditionalTrue  
< TSource, TObjectTag >
```
