The diagram shows a class hierarchy. The base class, `boost::statechart::event< EvWaypoint134 < TSource, TOrthogonal > >`, is represented by a white box with a thin grey border. It has three horizontal compartments, with the first containing the class name. The derived class, `cl_move_base_z::EvWaypoint134 < TSource, TOrthogonal >`, is represented by a grey box with a thick black border. It has three horizontal compartments: the first contains the class name, the second contains the public attribute `+ waypointIndex`, and the third is empty. A blue arrow with an open triangular head points from the derived class box to the base class box, indicating inheritance.
