

```
boost::statechart::  
event< EvKeyPressP<  
    TSource, TObjectTag > >
```

A UML class diagram showing inheritance. The base class, `boost::statechart::event< EvKeyPressP< TSource, TObjectTag > >`, is represented by a white box with a black border and is divided into three horizontal compartments. The top compartment contains the class name, while the middle and bottom compartments are empty. The derived class, `cl_keyboard::EvKeyPressP< TSource, TObjectTag >`, is represented by a gray box with a black border and is also divided into three horizontal compartments. The top compartment contains the class name, while the middle and bottom compartments are empty. A blue arrow with an open triangular head points from the top compartment of the derived class to the top compartment of the base class, indicating an inheritance relationship.

```
cl_keyboard::EvKeyPressP  
< TSource, TObjectTag >
```
