

```
boost::statechart::  
event< EvKeyPressF<  
    TSource, TObjectTag > >
```

The diagram illustrates an inheritance relationship. A blue arrow points from the 'keyboard_client::EvKeyPressF' class box to the 'boost::statechart::event' class box. Both boxes are divided into three horizontal compartments. The top compartment of the 'boost::statechart::event' box contains the text 'boost::statechart::event< EvKeyPressF< TSource, TObjectTag > >'. The top compartment of the 'keyboard_client::EvKeyPressF' box contains the text 'keyboard_client::EvKeyPressF< TSource, TObjectTag >'. The bottom two compartments of both boxes are empty.

```
keyboard_client::EvKeyPress  
F< TSource, TObjectTag >
```
