The diagram illustrates an inheritance relationship. The base class, `boost::statechart::event< EvWaypoint18< TSource, TObjectTag > >`, is represented by a white box with a black border. The derived class, `cl_move_base_z::EvWaypoint18< TSource, TObjectTag >`, is represented by a gray box with a black border. A blue arrow with a hollow triangular head points from the derived class to the base class, indicating that the derived class inherits from the base class. The derived class has a public attribute `+ waypointIndex`.
