The diagram illustrates an inheritance relationship. The base class, `boost::statechart::event< EvWaypoint66< TSource, TObjectTag > >`, is shown in a white box with a thin border. It has two empty compartments below the name. The derived class, `cl_move_base_z::EvWaypoint66< TSource, TObjectTag >`, is shown in a gray box with a thick border. It has a third compartment containing the attribute `+ waypointIndex`. A blue arrow with an open triangle head points from the derived class to the base class.
