

```
boost::statechart::  
event< EvMyBehavior  
< TSource, TOrthogonal > >
```

The diagram shows a class hierarchy. The base class, `boost::statechart::event< EvMyBehavior < TSource, TOrthogonal > >`, is represented by a white box with a black border and is divided into three horizontal sections. The top section contains the class name. The bottom section is empty. The derived class, `sm_ferrari::cl_subscriber::EvMyBehavior< TSource, TOrthogonal >`, is represented by a gray box with a black border and is also divided into three horizontal sections. The top section contains the class name. The bottom two sections are empty. A blue arrow with a hollow triangular head points from the top of the derived class box to the bottom of the base class box, indicating inheritance.

```
sm_ferrari::cl_subscriber  
::EvMyBehavior< TSource,  
TOrthogonal >
```
