

smacc::specificNamedOnExit

```
graph LR; A[smacc::specificNamedOnExit] --> B[smacc::specificNamedOnExit]
```

The diagram consists of two rectangular boxes, one on the left and one on the right, both containing the text 'smacc::specificNamedOnExit'. A dark blue arrow points from the right side of the left box to the left side of the right box, indicating a pointer or reference relationship between the two variables.
