

```
boost::statechart::  
event< EvWaypoint209  
< TSource, TObjectTag > >
```

The diagram shows two class boxes. The top box is white and represents the base class `boost::statechart::event< EvWaypoint209< TSource, TObjectTag > >`. The bottom box is gray and represents the derived class `move_base_z_client::EvWaypoint209< TSource, TObjectTag >`. A blue arrow with an open triangular head points from the bottom box to the bottom edge of the top box, indicating inheritance.

```
move_base_z_client  
::EvWaypoint209< TSource,  
TObjectTag >
```

```
+ waypointIndex
```
